SKILLS SUMMARY

Languages:	Python, C, C++, Java
Machine Learning:	Machine Learning, Feature Engineering, Data Analysis
Libraries:	NumPy, Pandas, Matplotlib, Seaborn
Deep Learning:	CNN, Neural Networks
Core Subjects:	Data Structures and Algorithms, Object-Oriented Programming, Computer Programming
Soft Skills:	Problem Solving, Adaptability, Team Collaboration, Intellectual Curiosity

PROJECTS

Tropical Cyclone Formation – intensity Prediction Using Machine Learning | [GitHub](#) Aug 2026 – Sep 2026

- Developed a machine learning-based system to predict tropical cyclone formation and intensity using historical meteorological and atmospheric datasets.
- Performed comprehensive data pre-processing, feature engineering, and exploratory data analysis to identify important patterns influencing cyclone development.
- Applied predictive analytics to support early warning systems, cyclone risk assessment, and improved disaster preparedness and response planning.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter

Automatic MCQ – Quiz Generator Using Generative AI | [GitHub](#) Jun 2026 – Jul 2026

- Developed an AI-powered system to automatically generate multiple-choice questions, answer keys, and explanations from uploaded educational learning materials.
- Applied NLP and Transformer-based models, including T5 and BART, to generate contextually relevant and meaningful assessment questions.
- Designed the solution to support personalized learning, automated assessments, and efficient generation of practice quizzes for students.

Tech Stack: Python, NLP, Transformers, T5, BART, Hugging Face, PyTorch, Streamlit

Doc Sensei – Intelligent PDF & DOCX Question Answering System | [GitHub](#) Jun 2026 – Jul 2026

- Developed an AI-powered document question-answering system using Retrieval-Augmented Generation (RAG) to provide accurate, context-aware responses from uploaded documents.
- Implemented document chunking, text embeddings, semantic search, and vector storage using ChromaDB to enable efficient and relevant information retrieval.
- Deployed the application on Streamlit Community Cloud, allowing users to upload documents and interactively query their content through a conversational interface.

Tech Stack: Python, NLP, Transformers, T5, BART, Hugging Face, PyTorch, Streamlit

TRAINING

AI Engineer Launchpad: Mastering LLMs and Agentic AI | [Certificate](#) Jun2026 – Jul 2026

- Completed a structured AI engineering course focused on Large Language Models (LLMs), Generative AI and Agentic AI.
- Developed foundational understanding of LLM applications, prompt engineering, AI agents, and agentic workflows through guided learning and practical exercises.
- Strengthened skills in designing AI-powered solutions and automation workflows using modern generative AI concepts.

Tech Stack: Python, Large Language Models (LLMs), Generative AI, Agentic AI, Prompt Engineering, AI Agents, LangChain, API

CERTIFICATIONS / CERTIFICATES

Computer Programming iAmneo	May 2025
Programming in Java iAmneo	May 2026
Data Structure and Algorithm iAmneo	Jun 2026
Object Oriented Programming iAmneo	Jun 2026

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology – Computer Science and Engineering – CGPA: 7.09	Jul 2024 – Aug 2028
Narayana Junior College	Nellore, Andhra Pradesh
Intermediate – Percentage: 95.4	June 2022 – March 2024
Sri Venkateswara High School	Kadapa, Andhra Pradesh
Matriculation – Percentage: 91	June 2021 – March 2022
